~~E. G. E. Cap~~

TO : H. S. Bergen
B2SL

Following Hart's request to you, you asked me to discuss with George Levinskas, whom we might recommend to G. E. as an independent toxicologist.

The following possible contacts are:

a) Toxicologists of good reputation,
b) Not working for us on PCB issue.

We cannot speak for either their attitude to PCB or their potential involvement with other parties on PCBs. Equally, we do not know how knowledgeable they are on PCBs at this point in time.

1. Dr. Leon Goldberg
   Institute of Comparative and Human Toxicology
   Albany Medical College
   Albany, New York 12208

2. Dr. Donald Taves
   Dept. of Pharmacology
   University of Rochester
   Rochester, New York 14602

3. Dr. Paul E. Palm
   A. D. Little, Inc.
   30 Memorial Drive
   Cambridge, Mass. 02142

G. E. would probably get an objective view from these gentlemen. George suggested that G. E. should avoid Dr. Nelson's group at New York University.
