For the First Time

an All-Purpose soft paste

. . . a new and improved Dutch Boy soft paste white lead will produce a paint that handles fine as well as a durable outside gloss. Leaves grinding by a special milling process, during which a small amount of paste turpentine is added, is the reason why:

IT'S AN ALL-PURPOSE LEAD . . .

It can be used equally well for inside flat or outside gloss paints. No stone need be hung over kinds of paints.

IT'S SMOOTHER . . .

Some grinding gives this white-lead a new consistency. It makes a paint that's easy brushing and leveling.

IT THINS EASIER AND QUICKER . . .

The "work" softness of this new paste reduces still further the time and effort of mixing. It is ready for the brush to do thins.

IT GIVES WHITER WHITES AND CLEANER TINTS . . .

The only paste in every volume than the old soft paste. The difference is noticeable the minute you open a keg.

Correct it time Lead also sold in the new form.

The Sealed Can Protects You

ONLY the finest of selected oil is put in these streamlined black and yellow Dutch Boy Linseed cans. There, every care is exacted of the factory to make sure that you receive nothing but Dutch Boy Linseed Oil—as pure as any oil you can buy . . . clear . . . carefully filtered . . . well-aged.

AS A PAINTER

you have a reputation for good painting to uphold. Safeguard this reputation by mixing your white-lead with Dutch Boy Linseed Oil. Then you can be absolutely sure of high quality, and, in addition, you will be using a linseed oil particularly made for mixing with Dutch Boy white-lead. Here is a combination that will back up your skill on any job.

Dutch Boy Linseed Oil, in its handy one and five-gallon sealed cans gives you convenient sizes and your customers confidence. Its exceptionally good drying qualities will help you any grind keys to all troubles. Dutch Boy Linseed Oil is good looser sure on any job. Comes either raw or boiled.

A Modern Primer for All Porous Surfaces

DUTCH BOY Wall Primer meets every requirement of an ideal sealer and paint coat combined. It is designed for the white-lead painter to enable him to produce a quality job under today's conditions.

THIS EFFICIENT PRIMER—

1. Works easily under the brush—keeps labor costs low.
2. Seals ALL porous surfaces effectively and completely.
3. Hides even the darkest surfaces with a solid coat.
4. Spreads 1000 square feet per gallon on smooth plaster—real economy.
5. Penetrates the surface sufficiently to prevent later flaking or peeling.
6. Requires no special thinners, special colors or special containers.

For Better Interior Painting

DUTCH BOY Flatting Oil is a skillfully blended flatting liquid for use with Dutch Boy white-lead to produce flat and semi-flat paint for modern interior painting and a finish that is sanitary, washable, durable, beautiful and economical.

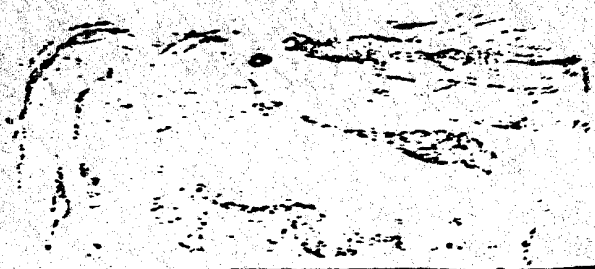

White-lead and flatting oil paint sets up slowly enough for the painter to work fairly large stretches without worry about catching laps. It brushes on easily, hides the surface well, levels up before setting, leaves no unsightly brush marks. It is the ideal flat paint for use over Dutch Boy Wall Primer.

Dutch Boy Flatting Oil is also a perfect glazing liquid as well as a blending liquid for tiffany effects. Use it for bronzing, for enamel undercoatings, for plastic paint, for thinning stencil paint. Many painters use it too, in place of volatile thinners in their outside paint, finding that it improves the working and brushing qualities of their paint.

A NEW PAINTER'S PRODUCT

THIS latest addition to the Dutch Boy family of painters' products is just one more proof that we accept our responsibility to the white-lead painters of the country. Under today's conditions and with today's materials, paint drier is a very important necessity to most painters. Realizing this, we experimented and tested until we developed a product which measures up to the Dutch Boy standard of quality.

You can use this drier with your Dutch Boy white-lead and Dutch Boy linseed oil—in perfect safety. It is an unusually strong drier of the kind known scientifically as "resinate." Labored to bring about uniform drying of the paint—always uniform in strength. It will not crackle or "pucker" the paint.

In brief, it is a Dutch Boy product in every sense of the word, measuring up to the high standard of reliability and quality that goes with every product bearing the Dutch Boy trademark.

THESE NEW COLORS

are especially designed for use in tinting paint made with Dutch Boy white-lead. Under the Dutch Boy system they bring you high tinting strength, ideal consistency and true color tone.

HIGH TINTING STRENGTH

Quality materials, extremely fine grinding, extra mixing to insure complete "wetting", are reasons for the exceptionally high tinting strength of all Dutch Boy Colors in Oil.

NEW CONSISTENCY

A short, "buttery" paste that mixes quickly and thoroughly into your paint, develops the ideal consistency of flowing readily. Use them just as they come in the can. No thinning. No kneading. No smoothing.

TRUE COLOR TONE

Every care is exercised to consistently maintain Dutch Boy Colors in Oil at the standard of what true color tones should be. This means clean, pure tints in your white-lead paint.
