

1 pathology, what was taken from his lung, and he looked  
2 at that under the microscope, and he as well confirmed  
3 the diagnosis that was made of Mr. Wood's  
4 mesothelioma.

5 He will tell you that Mr. Wood's  
6 mesothelioma was caused by his exposure to asbestos.

7 You will also hear from Dr. Levine who will  
8 also come in and who will testify to you concerning  
9 his treatment of Mr. Wood, and he also will tell you  
10 that he confirms the diagnosis of mesothelioma from  
11 which Mr. Wood died of. He will tell you that Mr.  
12 Wood's mesothelioma was caused by asbestos exposure.

13 Ladies and gentlemen, the only thing in this  
14 country which causes mesothelioma is asbestos  
15 exposure, and that is why when Dr. Levine and Dr. Moko  
16 back in January of 1990 at Baltimore County General  
17 Hospital took an asbestos exposure history from Mr.  
18 Wood to determine where his actual exposure was  
19 because they knew that with mesothelioma, the way you  
20 get it is through asbestos exposure.

21 As a practical matter, if you do not have
