SUBJECT: Final Review of Asbestos Handling Videotape Script

The Bishop Engineering Resins Plant has undertaken a difficult and commendable task of developing a training film for its employees who handle asbestos. This film will highlight the step-by-step procedures required for the safe handling of asbestos, including the cleaning of equipment and accidental spills. In addition, a layman's explanation of the health risks associated with asbestos exposure has been provided by Dave Barrett.

Please review the script. Your response is requested by Nov. 30, 1982, so that this training film may be completed.

If I do not hear from you by the above date, I will assume that the contents of this film meet with your approval.
