

YOU CAN RE-SIDE YOUR BARN WITH
RUBEROID STONEWALL BOARD

JUST SCORE IT—SNAP IT—NAIL IT!
goes up fast—stays up a lifetime

Here's an idea that helps you save money and time. Big 4' x 8' panels of nonflammable RUBEROID Stonewall Board go up in less time than it would take to paint—building practically a new barn right over the old! There's no need for sawing. Just score it with a sharp tool and break it off. It never needs a coat of paint.

Use it inside, too—for partitions, ceilings, doors, firestops and a thousand other uses. You can forget about decay, rats, and termites. Made of asbestos fibers and Portland cement, it protects any farm building for years. Write for information today to The RUBEROID Co., 500 Fifth Ave., New York 36, N. Y.

For unusual or difficult areas use

PANELSTONE

RUBEROID Panelstone is a new multi-purpose asbestos-cement building board that is *non-flammable* and *weather*. Panelstone has an unusually high asbestos fibre content. It is formed under

tremendous hydraulic pressure. It's the perfect material for building and repair work where extra durability or super smoothness is required. It is ideal for curved surfaces.
