PCBs - Great Lakes Meeting

F. J. Fitzgerald
R. E. Keller
J. F. Stapleton

H. S. Bergen B2SL
G. L. Bratsch B3NA

Several weeks ago I received by telephone an invitation to attend a meeting of the Governor's Great Lakes Regional Interdisciplinary Pesticide Council. PCBs were selected as the main topic of discussion. I did not commit myself at the time but suggested that a description of the meeting and the invitation be sent to me in a confirming letter.

Attached is a copy of the letter and the proposed agenda. Note that I have been asked to discuss quantities, description and disposal of PCBs in the Lake Michigan area.

Since the emphasis of the day's meeting will be predominantly on PCBs, I do not believe that Monsanto can decline the invitation to attend and participate. I propose, however, that my remarks be made orally and be confined to that information which we have previously disclosed, such as production quantities through the years, former applications, current marketing policy and recommended disposal practices.

Note also that Scott Tucker is listed as receiving a carbon copy of the invitation. I believe they would like very much to have Scott present to participate in the discussions relating to sampling techniques and analytical methodology.

I would appreciate comments from everyone receiving copies of this memo before I respond to Mr. Frank.
