

November 10, 1931

Dr. F. R. Walters,
Kellogg Company,
Battle Creek, Mich.

Dear Dr. Walters:

Allow me to thank you for your letter of
October 28 with its further details.

I can fully understand your dilemma in
dealing with a case weeks after the cessation of
exposure, in which the exposure must in any case
have been small. I quite agree with you that in
such cases one has nothing to rely upon but symptoma-
tic information.

I shall be interested if there are any
further developments in this case.

Cordially yours,

RAK:ET
