

Thirty-Second Annual Report

Fiscal Year Ended October 31st,

1949

THE GLIDDEN COMPANY

THE GLIDDEN COMPANY
CLEVELAND, OHIO

January 12, 1950

TO THE STOCKHOLDERS OF
THE GLIDDEN COMPANY:

The last fiscal year of your Company which ended October 31, 1949 was a year of great progress in research and development. During this period large expenditures were made in order to bring to a fruition some of the projects on which our organization has been working for some time. To illustrate, our Paint and Varnish Division succeeded in producing Spred SATIN, a wonderful new washable wall paint which is an exclusive Glidden formulation consisting of the finest pigments of our own manufacture, plus the same ingredients used in making synthetic rubber. This development marks a new era in paint formulation.

In the Food Division, coincident with the passage of the Yellow Margarine Bill in Ohio, this Division has perfected our Durkee Grade AA Margarine which is of the highest quality.

In the Soybean Division, because of their experience in our Research Laboratories in the development of hormones, including progesterone and testosterone from soybean sterols, our steroid research chemists were well equipped to participate actively in the development of the cortical hormones. Work along this line is proceeding rapidly and we hope to be able to produce cortisone and its allied compounds in quantity before the end of 1950. The work of this laboratory on hormones established a new record in this direction, and in view of the great need for cortisone for the more than seven million sufferers from arthritis, it is evident that if our plans are realized, this will result in an important development for our fine chemical department.

Throughout the year special emphasis has been placed on the reduction of costs and the improvement of our materials handling. This has resulted in greater efficiency and the saving of labor costs.

Our program for the rehabilitation and improvement of our various factories has been practically completed and our expenses in this direction for the new year will be greatly reduced as all of the various plants are now in first class condition. In the four years since November 1, 1945, our Company has expended a total of \$14,334,502.42 in net plant and capital additions, and through these capital expenditures we have greatly increased our productive capacity. Major units added last year are a new soybean processing plant and storage silos at Indianapolis, a margarine manufacturing plant at Macon, Georgia, a new

GLD002790

soybean extraction plant at Chicago, and a margarine distribution warehouse at Cambridge, Massachusetts. At the present time we have no plans for any large major expansion, and our construction program that has been under way for the last four years is nearly completed.

Our net dollar sales for the year declined approximately 20% due to the big drop in prices of raw materials and finished products. In units of output, our volume was within 5% of the previous year.

The net profit, after taxes and all charges, was \$6,191,923.16, equivalent after preferred dividends, to \$3.23 on the present outstanding common stock, and after deducting treasury shares.

Our gross inventory was very substantially decreased in 1949. Under the LIFO method of inventory accounting, the principal raw materials were carried on our books at the close of the year at a valuation of \$3,537,319.99 less than replacement cost at that time. The balance of the inventories were priced at the lower of cost or market. The Company continues its policy of protecting inventories by hedging on the commodity markets, so far as possible, our stocks of soybeans and edible oils. In the case of flaxseed and linseed oil, our commodity contracts with the Government afford inventory protection.

The net worth of your Company, excluding treasury shares, at October 31, 1949 was \$56,837,492.20, or \$26.32 per common share on the shares outstanding at that date. This compares with a net worth per common share on October 31, 1947 of \$21.93 and on October 31, 1948 of \$25.05. This increasing value of our stock reflects the policy of having plowed back a portion of our earnings each year into income producing properties.

Our labor relations at our various plants are cooperative and friendly and we find that labor is more efficient than it has been for some time.

On behalf of the Board of Directors we extend our thanks and sincere appreciation to all the members of the organization for their co-operation during the past year.

DWIGHT P. JOYCE

UNION COMMERCE BUILDING

Board of Directors,
The Glidden Company,
Cleveland, Ohio.

We have examined the consolidated balance sheet of The Glidden Company and Canadian subsidiary as of October 31, 1949, and the related statements of consolidated profit and loss and surplus for the fiscal year then ended. Our examination was made in accordance with generally accepted auditing standards, and accordingly included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

In our opinion, the accompanying balance sheet and statements of profit and loss and surplus present fairly the consolidated financial position of The Glidden Company and Canadian subsidiary at October 31, 1949, and the results of their operations for the fiscal year then ended, in conformity with generally accepted accounting principles applied on a basis consistent with that of the preceding year.
