June 14, 1962

CATTLE, COTTON AND CORN

This headline sounds something like the title of a popular song. And in a way, it is musical — at least to the ears of Alfred Kerr. Mr. Kerr, still in his fifties, retired Jan. 1 after going to sea for 40 years and spending nearly half that time in the Esso fleet.

Although technically Mr. Kerr is a Humble annuitant, he has not retired in the usual sense. He has just switched from the bounding main to the rolling plain of east-central Texas, from a Bos'n's berth to the good earth.

It started about 30 years ago when Alfred and Karen, his wife, bought his mother-in-law's farm in Taylor, Texas. Over the years they paid off the debts on it, built it up through prudent management and Alfred's earnings as a seaman. Eleven years ago they purchased adjoining property and once more went into debt, this time for \$16,000. And again, prudent management, good luck and Alfred's continuous employment in the fleet paid off the mortgage — and built up some savings, besides.

Now the Kerrs' have 223 acres — 80 in cotton, 70 in corn and the balance in pasture. The grass land supports about 60 head of milk and beef cattle, although the figure varies as he buys and sells from time to time. Right now he has 10 baby calves recently purchased at an auction. He'll keep them for three or four months — until they are big enough to be sold for veal.

The Kerrs' daughter, Carrie Jo Gordon and her husband, Jack, also have a house on the property. They have three fine boys — Jackie, 10, Alfred, 6 and David, 4. Carrie Jo is a registered nurse (Mrs. Kerr is, too) and works two days a week at

Creek that runs through the Kerr Farm grazing land.

Retired Bos'n Alfred Kerr and family — grandsons Alfred and David, daughter Carrie Jo Gordon and Mrs. Kerr. Another grandson, Jackie, was in school.

Mr. Kerr and a few of his cattle, which are his special interest. He is stroking Sammy, a bull which he says is a gentle and good-natured animal.

Part of the Kerrs' 80 acres of cotton. The land in cotton and corn is worked on shares — Alfred receiving every third bushel of corn and every fourth bale of cotton.

the Scott and White Memorial Hospital ("the Mayo Brothers of the South") in Temple, Texas.

In addition to cattle, Kerr's Farm population includes a small flock of sheep, chickens, ducks, turkeys, geese, pigeons, ring neck doves, two pigs, two dogs and three Fords—a new pick-up truck, a "like new" sedan, and an old tractor.

Obviously enjoying life on the farm, Mr. Kerr said, "I made it working for Esso". While there's a lot of truth in that, we'd be inclined to give a good share of the credit to his family, too.

Capt. J. G. Moffitt Named Manager, Operating Department

Captain James G. Moffitt, who served in the fleet for 18 years, advancing from AB to Master, returns to the Marine Division this month as Manager of the Operating Department. For the past four years he has been Operating Superintendent for Esso Tankers, Inc. in New York.

Captain Moffitt first went to sea in 1931 as a deck boy in the Clyde Line's *Cherokee*. He joined the Company as AB in the *H. M. Flagler* on May 20, 1935, advanced to Third Mate in 1939 and served throughout World War II as Second and Chief Mate. His first command was the *W. H. Libby* in Sept. 1945. Later he was Master of the *Esso Aruba*, *Esso Bethlehem* and several other vessels.

Coming ashore in March 1953, Captain Moffitt was Operations Assistant, Harbor Facilities, working on the improvement of existing terminals and the development of new ones. He was Port Captain in the Port of New York Office from May 1955 until his transfer to Esso Tankers in mid-1958.

In his new position, Captain Moffitt succeeds Captain M. Breece, who returns to New York as Manager of the Port of New York Office.

Humble Continues S. E. Expansion

During the past 30 days the Company has announced acquisition of 49 service stations in Georgia and Mississippi. Thirty-eight of the stations, plus accounts and a bulk plant, were acquired from the Empire Oil Co., of Savannah and 11 stations, the properties of Gillespie Oil Co., are in the Hattiesburg, Miss. area.

In February and March, 52 stations in Florida, formerly operated by the Southern Oil Co. of Fort Lauderdale and the Florida Southern Oil Co., were purchased.

Stationary Butterworth Machines Installed in Esso Washington

Two of the *Esso Washington's* cargo tanks are being equipped with fixed installations of Butterworth machines during the vessel's present repair period. The No. 4 starboard (coated) and No. 8 port (uncoated) tanks will each have five machines—one in each corner, 30' below the deck and one in the center, 38' below deck.

To wash tanks with this system, it will only be necessary to start the Butterworth and stripper pumps and open the valves (located beneath walkway) to the machines. The Butterworth plates are not disturbed.

Two other tanks in the *Washington*, the No. 1 wings, are being fitted to carry solvents and 12 tanks—Nos. 1, 2, 4 and 6 across—are being coated with Humble's Rust-Ban 191.

In addition to the shipyard work, an impressive amount of repairs was accomplished by the ship's officers and crew during the nearly six weeks' stay at the Newport News yard. Good planning and organization by Captain George E. Christiansen, Chief Mate Ernest Palazzini, Chief Engineer Fulton A. Bergeron and First Ass't Roland A. Walton, plus a fine esprit de corps among the men were responsible.

TAFFRAIL TALK

One youngster who won't have to go to school on his birthday is George John Redepenning. He was born May 30 (Memorial Day) to Ann and George Redepenning, of Toms River, N. J., weighing in at 7 lbs., 8 oz. George, Sr. was recently Oiler in the *Esso Zurich*.

A new products pipeline from Baytown to San Antonio was put into service May 23 by Humble Pipe Line Co. Gasoline was the first product to start westward and reached San Antonio on May 31. The new system will total 270 miles of pipe when a branch from Luling to Austin is completed later this summer.

Just as men in the *Esso Gettysburg* had a box seat off Cape Canaveral for the blast-off of John Glenn in the *Friendship 7* on Feb. 20, the crew

ESSO FLEET NEWS is published for the seagoing employees of the Marine Division, Humble Oil & Refining Co.: J. D. Rogers, General Manager; Joseph Andreae, Assistant General Manager; Sydney Wire, Assistant General Manager.

Contributions and suggestions are invited and should be addressed to The Editor, ESSO FLEET NEWS, Humble Oil & Refining Co., P. O. Box 1512, Houston 1, Texas.

of the *Esso Miami* were eye witnesses of the start of Scott Carpenter's orbits in the *Aurora 7* on May 24. AB Charles H. Tyler, of the *Miami*, wrote that "most of the crew watched the count down on TV and then rushed for the weather deck at 'ignite'. We had a fine, clear view of the first and second stages."

* * *

Captain James S. LeCain (ret. April 1, 1952), photographed at the Marine Division headquarters in Houston on May 17. The Captain was enroute from his home in Long Beach, Calif. to visit relatives in Florida and New Jersey and on up to Nova Scotia for some trout fishing. Why should he go so far for a few fish? He wants to and besides, he was born "up thataway".

Captain LeCain is 75, looks fine and has been gathering no moss, driving about 1,000 miles a month in his "command" — a Chrysler Imperial.

* * *

Two West Coast mates recently pleaded guilty to charges of negligence in allowing oil to pollute harbor waters and each was fined \$100. One mate miscalculated his loading time by two minutes, causing an overflow. The other failed to have valves lined up properly when de-ballasting and pumped oil overboard with the water.

* * *

A roughness indicator, a device to instantly determine common ailments of auto engines, has been developed by Esso Research & Engineering Co. The electronic "stethoscope", about the size of a floor model TV set, makes a graph of the engine's "heartbeat" and can tell by the character of the vibrations whether the problem is in spark plugs, carburetor, timing, or other cause. It takes less than two minutes to open the hood, test the engine and close the hood.

The tester is not now commercially available but a patent has been applied for. It has been used for six months to test new engine fuels.

RECENT RETIREMENTS

RADIO OFFICER ANDREW R. HAMILTON began working in the "radio shacks" of merchant ships in 1919 — when the term was more or less appropriate — after serving in the U. S. Army Signal Corps in World War I. He made a few trips in the Company's *L. J. Drake* in 1923, sailed in the Dollar Line's *Manchuria* in 1927 and,

from 1929 to 1935, the *Cristobal*, of the Panama Line.

Since May 19, 1936, when he signed on in the *W. C. Teagle*, Mr. Hamilton has been in the Esso fleet — a total of 26 years, 5 months. In Jan. 1939 he was Radio Officer in the *Esso Baytown* when she made the famous rescue of 10 survivors from the British seaplane *Cavalier*, which was forced down enroute from New York to Bermuda. He was also assigned to that vessel in 1943, on a voyage that took him around the world. Most recent of the many vessels in which he sailed were the *Esso Gloucester*, *Boston* and *Gettysburg*.

Mr. Hamilton's plans after retirement June 1, are indefinite except for keeping an eye on Jersey stock, the buying of which he lists as one of his favorite "hobbies".

OILER DANIEL HENRY. Despite 42 years of following the sea, Dan Henry is at heart, still "a country boy from down in Tennessee". Born in Sevier County, Tenn., he joined the Navy in 1920 and served 10 years in (what else?) the *USS Tennessee*. After his discharge at Mare Island, Calif. and a few trips out of the West Coast in the early '30s, he started his Company career as Wiper in the *Charles G. Black* in Nov. 1933. A month later he advanced to Fireman in that ship and then to Storekeeper. He sailed in the latter rating and as Oiler in six vessels during World War II and, in fact, throughout his 26-plus years in the fleet.

Hank's last ship was the *Esso Newark*, which he left at Baytown on May 10 for paid leave and retirement on June 1. "The Master and crew were really nice to me," Hank said, "and I hated to leave. They gave me a gift check and told me to get whatever I wanted. I thank them all and my employer too, for the many courtesies they have shown me."

Mr. Henry intends to go back to Tennessee for a few weeks to visit his two brothers and do some fishing and then return to Baytown, where he has made many good friends.

Aboard the *Esso Newark*, May 9, Oiler Daniel Henry (center) was the recipient of a gift check and best wishes for his retirement from shipmates. Also in photo l. to r., are Third Ass't John B. Chamberlain, MM/2nd Pumpman Thomas A. Barden, Captain Harold F. Blytt and Chief Engineer Gregor O. W. Collins.

Photo by Chief Mate T. A. Johnson

Oiler Richard A. Vila, ex-Esso Newark, spends much of his paid leave time in Puerto Rico. He is shown here with his wife, Maria, and their four children at his father-in-law's house in Ceiba, about 40 miles SE of San Juan. The children are Lillian, 8, Richard, Jr., 4, Jimmy, 3, and Bobby, 2.

Richie was born in New York City, graduated from the New York Vocational and Technical High School and has been in the Esso fleet since Jan. 1952. In ten years' service he has had only 10 days of sick leave.

Cut Back Planned for Everett Refinery

Operations at the Everett Refinery will be reduced, starting July 1, to asphalt finishing and the use of tankage and the waterfront terminal.

In announcing the change, Refinery Manager John J. Coates said that the Company's greatest concern is for the personnel who will be affected. Of the present 289 employees, about 60 will be retained and 80 retired with additional retirement

The MIS-Adventures of

J. STUMBLEPRONE MC FRACTURE

Mac, here, is preparing to make a crash landing on deck. Stepping off a small crosswalk on a supertanker, he trod upon a Butterworth hose, twisted his right foot and broke a bone in it.

"Careless," the accident report said, "he should have looked where he was going." But perhaps J. S. did look. If so, he had four months' laid-up time to become convinced that a Butterworth hose makes an unsafe footing. Any hose, for that matter.

income. Some of the remainder will be offered transfers to other Company units and the balance will receive generous severance allowances and job placement services in finding new work.

Mr. Coates said the primary reason for reducing operations is that surplus capacity in the industry and in Humble has made Everett's output of light products no longer needed. In addition, the loss of Humble's largest wholesale customer, Standard Oil Co. (Ky.) was a factor. The Kentucky company merged with Standard of California last year.

Five Vessels Win Safety Honors

Five tankers of the Humble fleet were among 38 vessels honored at a luncheon in New York, June 5, when Admiral E. J. Roland, Commandant of the U. S. Coast Guard announced this year's Jones F. Devlin Awards. The awards, sponsored by the American Merchant Marine Institute, are made to vessels operating for two years or more without a lost-time personnel accident.

The *Esso Zurich* was among seven vessels receiving four-year awards and the *Esso Bangor*, *Chester*, *Florence*, *Greenville* and *Jacksonville* earned the two-year honors.

Special plaques were made for Sun Oil's *Dynafuel*, and the *Texaco Georgia*, which have 12 and six-year accident-free records, respectively.

OBITUARY

RALPH O. HEETER, 55, recently Machinist in the *Esso Chester*, died suddenly in Jersey City on May 29. He is survived by his wife, Helen, four sons and a daughter.

Born in the town of Hallton, Pa., Mr. Heeter served in the fleet for nearly 15 years. He sailed as Electrician from Dec. 1944 to July 1949 and as Machinist from Feb. 1954 until his death.

Mr. Heeter was ship's representative from the *Esso Chester* at the Esso Seamen's Association-Marine Management Conference in Bayonne last March.

MANUEL R. ALONSO, annuitant and former Pumpman, died May 30 in Newark, N. J. He was 66 years old and had been retired since June, 1954. A daughter in Newark and two brothers in Spain survive him.

Mr. Alonso had 32 years' service in the fleet, including 28 as Pumpman. He was in the *Chester O. Swain* for almost eight years and shipped out in five vessels during World War II. His last ship was the *Esso New Orleans*.
