Mr. Donald W. Fair
Fluor E&C, Inc.
1001 E. Ball Rd.
Anaheim, CA. 92803

Dear Mr. Fair:

TRACING AND INSULATION OF 18"
CHLORINE LINE

Reference: PF-326, Item 1.173.

Confirmation was received from V.O. Allison in Lake Charles that the 18" chlorine line from Plant "C" to Plant "A" will be electrically traced and insulated with 1 1/2" foam glass. Approximately 200 feet of a heating circuit originating Offsites will extend into Fluor's battery limits. Therefore, Fluor will be responsible for the following:

1. Procure oversize (19" or 20" I.D.) insulation for the traced line within Fluor's battery limits.
2. Install the heating cable (material to be supplied by Offsites).
3. Insulate the in-battery limits portion of the traced line.

Very truly yours,

Howard F. Wyatt / R.O. Butler
