

Installing CLOW 12" Ductile Cast Iron Pipe
in main downtown street in midwestern city

CLOW Ductile Cast Iron Pipe...

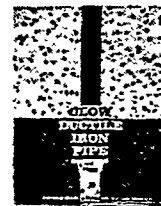

The Pipe of the Future ...being used today

Because of its vastly superior properties, CLOW Ductile Cast Iron Pipe is being used more and more by progressive cities for underground water mains. This is especially true in "high value" districts, such as illustrated above, where possible future breaks could be costly, or where traffic interruptions would be particularly annoying.

Very likely CLOW Ductile Cast Iron Pipe has advantages for your present piping plans. Ask for our Ductile Iron Pipe catalog which details the desirable properties of this pipe and its benefits to you.

CLOW Ductile Cast Iron Pipe can be
cut to length on the job.
