Dr. Graham Edgar
Ethyl Gasoline Corporation
Chrysler Building
New York City
New York

My dear Edgar:

Thanks for your wire in connection with the Robinson hearing. I shall arrive in New York Friday morning and I hope to have an opportunity to see you about several matters. None of these are of specific consequence that they need to disarrange any previous engagements which you may have made, but if it is convenient, I should be glad to see you.

Very truly yours,

RAK:is

Robert A. Kehoe, M.D.

P.S. I have just received your letter with its copy of Wilsdon's letter and the report of the autopsy. I have a previous record of the autopsy protocol so that this was not news.

As to the rebuttal of Dr. Gettler's testimony as to lead in food, I doubt if it will be possible to obtain an expert who will be in position to give adequate testimony. However, I should not consider this necessary since I believe it will be possible to show that Gettler's testimony is based on an inadequate knowledge of the literature of this subject which is full of references to the detection of normal lead within the past several years. I doubt if any referee would regard Dr. Gettler's opinion as valid against the overwhelming evidence which can be cited.

RAK.
