Aroclors

M.S.McC. to W. B. P. dated 12/21/71

M. S. McCauley, Washington, D. C.

In responding to Mr. C. Truxson's letter dated December 16, I would suggest that he be informed that Monsanto has not discontinued the manufacture of all Aroclor products but has reduced the number to only four. These are - Aroclor 1016, Aroclor 1242, Aroclor 1254 and Aroclor 1260. Our sale of these materials is strictly limited to electrical transformer and electrical capacitor use only.

Since these materials are not sold for plasticizer applications, I cannot supply him with the price list for plasticizers which he requested. If, however, he is interested in plasticizers of different chemical composition, we of course, would be happy to supply such a list.
