Dr. Kehoe
University of Cincinnati
Cincinnati, Ohio

Dear Dr. Kehoe:

I would like to know of a quick reference as to the possibility of getting lead poisoning from breathing fumes over a plumbers furnace when melting lead.

I have a man who claims that he got lead poisoning from breathing the fumes.

I do not think that he could have gotten it in this manner, but, in order to testify in court, I need information to prove my point.

Thank you for your help in this matter.

Sincerely yours,

S. C. SHEPARD, M. D.
