MR. LANKFORD: Objection.

THE WITNESS: Yeah, I think if I knew more where you were going I'd like to help you get through these questions because of the time of today. What is it that you want to get out of this line of questions?

Q Well --

A There are certainly, of the craftsmen there can be an increased risk depending on the era and the location in which these craftsmen work. There is no question about that.

Q So for the era that the 19, 1985 --

A If the exposures are occurring post-1985, the increased risk for people who start to become exposed in '85 is very low.

Q Let's talk about the first Spirtas paper if we could, and I don't think I have a copy of it with me but I know you got one there. If we were looking for the time frame studied by them?

THE WITNESS: Jen, would you give me the first Spirtas paper? I just have the second one here.

BY MR. RUCKDESCHEL:

Q May I reach across, Doctor, and take the chart?

A Certainly.

This isn't it. Yes, it is, okay.
