arc-welding accessories

JOE MAGEE SAYS:

More than 150 of the most important, high-quality arc-welding accessory items for arc-welding operators are listed in this catalog—the most complete selection available.

The products offered will meet the requirements of all ordinary welding work, as well as many special applications. Unusual requirements may, of course, occur at any time; and to meet these needs, General Electric is continually making available new and improved products. As a result, we can often furnish items, which, because of their newness or because there are only infrequent demands for them, are not listed.

Therefore, if you don't see what you want, ask for it—the chances are we'll have it.

QUANTITY DISCOUNTS *are available through your
G-E Welding Distributor*

CONTENTS

	Page
G-E Type Welding Electrode Holders and Parts	2
Jackson Type Welding Electrode Holders and Parts	3-5
Duro Type Welding Electrode Holders and Parts	5, 6
Eureka Type Electrode Holders and Parts	6, 7
Electric Carbon-arc Torch	7
Helmets and Handshields	7-9
Eye protectors	10
Cover Glasses and Colored Lenses	10, 11
Chrome Leather Protective Clothing	11, 12
Chrome Leather Gloves and Mittens	13
Asbestos and Flameproofed Clothing	14
Welding Cable Connectors and Ground Clamps	14, 15
Welder's Brushes, Electrode Carriers, and Fillet-weld Gage	16
Cleaning Tools	17
Welding Protective Aids—Flameproofed Curtain, Ultraviolet-ray Paint, Weld-spatter Preventive	
Coatings 1294, 9951, 9952, and Strike-easy Compound	17, 18
G-E Tungsten Electrodes	19, 20
Standard Accessory Sets	20

WELDER'S ASBESTOS AND FLAMEPROOFED CLOTHING

Asbestos-armored apron,
Cat. 92X720

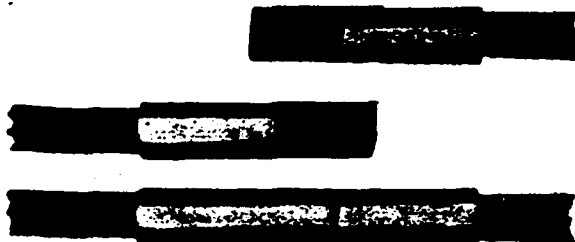

Flameproof apron, Cat. 60X203.
Flameproof sleevelets,
Cat. 60X202

Double-duty asbestos mitt, Cat. 60X200

Description	Cat. No.	Net Wt
Asbestos-armored Apron	92X720	2 lb
Flameproofed Apron	60X203	13 oz
Flameproofed Sleevelets	60X202	8 oz
Double-duty Asbestos Mitt	60X200	14 oz

WELDING CABLE CONNECTORS

Jackknife Type

Machined from solid brass stock, these connectors provide a practical, serviceable, economical means of quickly extending leads, etc. Dependable contact assured by spring action of split tongues. No tools required for operation. Can be insulated by rubber hose slipped over cable, or by tape.

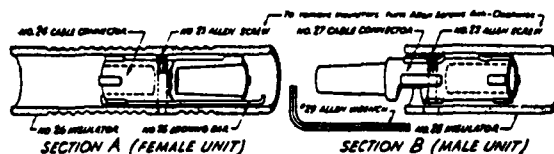

Insulated-taper Type

A convenient timesaver for changing cable connections, extending leads, etc. Easily and positively connected or disconnected by a simple twist. No bolts or screws. Adequately and entirely insulated with horn fiber. Insulation extends past end of female half of connector, which should always be used on the live side. Different colors can be used to indicate polarity.

Bolt Type

Cable connectors of this type provide a rigid, positive, nonslipping method of connecting welding cables. Two drop-forged electrolytic copper lugs are bolted together by one square-shoulder, nonrotating steel bolt, with hardened nut and lock washer. Surfaces of lugs are machined for full contact. Insulation can be provided by a flexible rubber tube or by friction tape.

To assemble, insert apart as shown by arrows
