

FILE NAME: Owens-Corning (OC)

DATE: 1955 May 18

DOC#: OC380

DOCUMENT DESCRIPTION: Memo

PEx E # 52

May 18, 1955

Mr. Hugh T. Williams - Toledo

When you answer Bob McArthur's letter of April 25, please minimize the "health angle" as I've brought is looking into it further for me.

100 to 1 chances are it is "asbestososis" and can not be hung on Fiberglas or mineral wools.

If other "health" problems arise, please keep me posted.
