J.P. Woodard

Report on Dr. Gardner's
asbestos dust experiments

Any plan for publishing this material must take into consideration the asbestos textile manufacturing group which, along with Johns-Manville, provided the funds. In the original arrangement it was stipulated that this group should review and approve anything that might ultimately be published. Three of the group have indicated an active and continuing interest, namely, Raybestos-Manhattan, Inc., Keesbey & Mattison, and Cathe Corporation.
