SUBJECT: Polyvinyl and Vinyl Chloride Monitoring Program

Dear Mr. Janik:

The purpose of this letter is to confirm our telephone conversation of February 6, 1975, and to provide you with information concerning Mogul's comprehensive Vinyl Chloride Monitoring Program in response to the new regulations set forth by the Occupational Safety and Health Administration. This program includes personnel sampler rentals, carbon absorption tubes, analysis and a confidential written report.

Mogul's environmental specialists are thoroughly familiar with the regulations as set forth by OSHA and our testing procedures are designed in accordance with government regulatory agency specifications.

The enclosed brochure details specifics of our Vinyl Chloride Monitoring Program and also included is our New General Enviro-Services brochure which illustrates the total offerings of our Environmental Program.

Our staff of experienced environmental scientists are prepared to assist you in meeting the OSHA Air Monitoring requirements for Vinyl Chloride. This program may be useful to you not only in your plants, but also as a service provided by you to your distributors or customers who utilize Vinyl Chloride. Please feel free to contact me at our Chagrin Falls Office if you need additional information or wish to discuss the implementation of this program.

Very truly yours,
THE MOGUL CORPORATION

Owen G. Foster

A NEW SYSTEM OF ENVIRONMENTAL SERVICE

Mogul's Enviroservice Programs comprise a new system of service to meet a wide range of pollution and environmental problems:

- Water Quality Programs • Air Quality Programs
- Safety Programs • Engineering Programs
- Management Consultation Programs
- Educational Programs

Accompanied by appropriate technical, engineering, management and educational services, these programs allow a very specific selection of service. The client selects one or more programs to meet his immediate needs and adds additional programs to meet his future requirements in building a total environmental control program.

Mogul's Enviroservice Programs offer complete localized assistance. Strategically located Technical Centers provide analytical laboratories and field survey teams. Mogul's Technical Centers provide important co-ordination locally and nationally. Customers with multiple plants are assured of standardized procedures with localized service.

The Mogul Technical Centers are equipped with instruments and equipment to provide a wide range of tests and measurements. A central staff of licensed professional engineers provides additional service to assist in developing procedures and designing plants for waste treatment. These capabilities provide valuable assistance for firms who must cope with the many regulations and criteria for environmental controls.

PROGRAM A-VCM

VINYL CHLORIDE MONITORING PROGRAM

Mogul's Technical Centers are uniquely located Nationwide to give local assistance to industry.

SERVICE PROVIDES:

- Review of OSHA guidelines for Vinyl Chloride to determine compliance requirements.
- Preliminary survey if necessary to determine sampling point locations and techniques.
- Analysis of samples for Vinyl Chloride by gas/liquid chromatography.
- A comprehensive, confidential report.
- Permanent portfolio for control programs.

This program is but one of a series. For detailed information on all of Mogul's EnviroService Programs, contact your local Mogul Representative or the nearest Mogul Technical Center listed on the back of this brochure.

The Federal Register of October 4, 1974 reported that "...NO EMPLOYEE MAY BE EXPOSED TO VINYL CHLORIDE OF CONCENTRATIONS GREATER THAN 1 PPM AVERAGED OVER ANY 8-HOUR PERIOD".

MOGUL CAN HELP!

1. An EnviroService specialist will survey your facility if necessary and instruct you in the proper sample collection procedure.
2. Mogul will provide a FIRM PRICED custom proposal.
3. Sample kits are available, including precalibrated sample pump, carbon adsorption tubes and complete sampling instructions.
4. Data will be compared with Occupational Safety & Health Act (OSHA) requirements and evaluated to determine what process modifications may be needed.
5. If plant modifications or process changes are required, Mogul can provide engineering assistance, cost estimates and plant designs.
