INTER-OFFICE CORRESPONDENCE

TO	Dr. L. J. Schradin	ADDRESS	Cincinnati
FROM	Mr. H. K. Ball	ADDRESS	Tulsa
SUBJECT	Continental Oil Company Artesia, New Mexico	DATE	March 13, 1945

CONFIDENTIAL

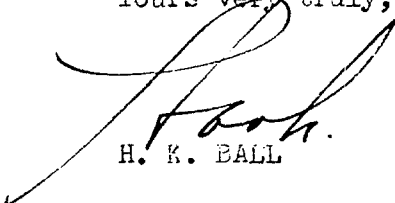

Dear Sirs:

When you were in the office on March 12 we discussed Mr. Lenington's report that he and I talked about the Artesia tank cleaning of November 29 when Cliff and I were in Dallas the week of December 4. I neglected to give you a memorandum on this while you were here.

It is recalled that Cliff and I did discuss this tank cleaning, particularly regarding whether or not hot work was to be done or concrete was to be poured in the bottom of the tank. Cliff stated that if a new steel bottom was to be put in he would be advised so that he could be present. As far as I can recall there was no question at all about the men not entering the tank to pour concrete.

I prefer not to say anything further regarding this discussion until I talk with Cliff as I am rather hazy on just what was said. I do feel certain that he asked whether or not it was okeh for the men to go ahead on cold work and I told him it was absolutely okeh.

Yours very truly,

H. K. BALL
