SUBJ: MSDS - NATURAL ALCOHOL

VISTA

The MSDS for the Indonesian alcohol will be essentially the same but we have to consider what modifications might be necessary in some sections. Specifically:

1. Product name, manufacturing address and what to do about routine and emergency phone numbers.
2. Is the physical and chemical data for ALFOL representative of the "naturals".
3. We will modify the toxicology section slightly to indicate the data is representative and not from actual product testing.
4. Any changes you want in Section 9 regarding shipping containers, etc.

Let me know how you want to proceed. I "gigged" Penney last week on your toxicology summary.
