The Ethyl Gasoline Corporation
Chrysler Building
New York, New York

Gentlemen:

We certainly appreciate your very courteous and prompt attention to our request for information regarding the illness of one of our employees who claims to have Lead Poisoning.

We have explained to him that we know of no cases of poisoning caused by Ethyl Gasoline and have also advised him that we received additional word from you that you know of no cases since the history of the corporation.

He is recovering and we feel that it would be additional expense on your part to have your medical examiner visit this patient. We do not think the case is serious enough to warrant this expense. We will secure a statement from the physician in charge and will give you a detailed report of the case within the next few days.

Again thanking you for your courtesy, we are

Very truly yours,

Highway Service Stations
