Dr. Wayne L. Fitter,
State Department of Health of Kentucky,
Bureau of Industrial Hygiene,
620 South Third Street,
Louisville 2, Kentucky.

Dear Dr. Fitter:

I have your letter of November 4, and I am very glad indeed to know that you have a paper on "Occupational Illnesses in Cotton Industries, II Chronic Respiratory Problems," which you might like to present at the spring meeting of the American Industrial Hygiene Association. If Phil Drinker is interested in it and has accepted it for publication, it seems very likely that we shall wish to invite you to present it.

As chairman of the Program Committee for the coming meeting, my associates and I are attempting to get together the available material, and would very much appreciate having you submit your paper to us for consideration. We do not require the manuscript, but we would like to have a resume of its contents with a sufficient description to enable us to determine what it is about and how long it will take you to present it, and what you will require by way of lantern and the like. We shall probably have more program material than we require, and therefore some selection will be necessary in order to develop a program that will hang together. Therefore careful consideration will be given to every subject submitted to us. The dead line for the submission of the material is January 10. I shall be very pleased to hear from you and to know what you have for us.

Very truly yours,

Robert A. Kehoe, M. D.
