

August 1, 1952

Dr. A. J. Lanza, Chairman
Institute of Industrial Medicine
New York University-Bellevue Medical Center
477 First Avenue
New York 16, New York

Dear Dr. Lanza:

Attached to this letter, as well as to Hugh Jackson's copy, is Suranne's first interim report of May 7, 1952, on the asbestosis and pulmonary cancer study that is being conducted for the Canadian C. A. M. A.

You will note that the conclusions so far do not indicate unfavorable findings. Of course, later conclusions on results of animal exposure beyond the fourteen months here covered may change the picture.

Sincerely yours,

J. P. Woodard
