Du Pont Company / Public Affairs Department / Wilmington, Delaware 19898

Industrial Paint Supply Company of Charlotte, N.C., has been named a distributor of maintenance and new construction finishes for the Du Pont Company.

According to Lee Carder, president of the Charlotte company, the new operation will include product supplies, sales and service. Du Pont products such as "Imron" polyurethane enamels, "Ganicin" zinc rich coatings, "Corlar" epoxy enamels, and "Imron" textile floor finishes, will be available to new and old business accounts within an approximate 100 mile radius of Charlotte. These include the textile, automotive, and chemical processing industries.

"The purpose of Du Pont's distributor program is to establish and maintain new accounts in geographic areas where the company does not maintain distribution facilities and support manpower," according to Joseph F. Mulvey, Du Pont's national accounts manager for maintenance finishes.

Mr. Carder, a 1959 graduate of Northeastern University with a degree in business management and economics, has held several management posts in the plastics and fibers industries.

Mr. Carder and his family reside in Charlotte.
