

millions of people

depend upon LIMITORQUES

(For light, heavy, portable, radio, motor and countless other controlled valve applications) millions depend upon the Limitorque valve operation. This also applies to the number of electric motors and other devices used in industrial systems. Then too, for the Oil, Gasoline, Gas and Water they consume, these same millions rely upon Limitorque to accurately and dependably open and close valves, day and night.

Yea, Limitorque is by far the most widely used Motorized Valve Operator in the world. It starts and reverses at the touch of a button and it protects valve stems, seats and gaskets from any possible damage in flexing.

Grating at its level best

The secret of Hendrick Mitco Steel Grating's levelness is its quality-controlled manufacture. It's made into integral panels under hundreds of tons of hydraulic pressure—has no bolts, rivets or welds to stress and warp. Ideal for flooring or walkways between buildings in industrial and public utility plants. Rectangular, square-edged steel bars provide safer, surer level walking surface, yet leave

90% open area for light and air. And for extra heavy industrial usage Hendrick Mitco is available in Heavy-Duty Steel Grating. Bearing bars for regular Mitco range from $\frac{3}{4}$ " x $\frac{1}{8}$ " to $2\frac{1}{4}$ " x $\frac{3}{16}$ "; cross bars from $\frac{5}{8}$ " x $\frac{1}{8}$ " to $1\frac{1}{4}$ " x $\frac{1}{8}$ "; and in Heavy-Duty bearing bars range from $2\frac{1}{4}$ " x $\frac{3}{8}$ " to 4 " x $\frac{3}{8}$ "; cross bars from 2 " x $\frac{5}{16}$ " to $2\frac{1}{2}$ " x $\frac{5}{16}$ ". Write for more information.
