USE OF S/P2 IN COLLISION REPAIR

As a result of CCAR's partnership with these companies, numerous Ford and Lincoln Mercury dealerships have already instituted the S/P2 "Collision and Paint" training for their autobody facilities.

Elsewhere in the collision repair industry, S/P2 has been endorsed by the California Autobody Association, adopted by CARSTAR and FIX Auto, the two largest independent autobody repair networks in North America.

COST

The cost is \$299 for a subscription to either S/P2 autobody or the S/P2 mechanical course. Access allows you to train ALL technicians or office staff from a single facility annually for one fixed price.

QUESTIONS

For more information, access the S/P2 Web training course at <http://www.sp2.org/>. Questions regarding this communication can be directed to Al Rocker at (313) 323-7516 or via email at arocker@ford.com.
