detail as possible, what is this National Cancer Institute document that you say states that the background level of mesotheliomas without asbestos exposure is 10 to 20 per million?

A In the general population it was about 10 per million per year in the '80s, 1980s, and that is based on -- I think based on the third national cancer survey data.

Q From what organization or government institution does that supposedly come from?

A The National Cancer Institute.

Q When was that published, sir?

A I don't remember.

Q Well, you do know how frequently the NCI updates its publications on this.

When did the last one come out?

A I don't know.

Q None have come out since 1992, have they?

A There may be. Actually I have an article that talks about that.

Q Well, while you are looking, and if you
