Mr. Hupp,

I am the Republican Party Chairman for the State of Wyoming. My day job is an environmental lawyer at the law firm of Holland & Hart. Many of the recent decisions of the EPA have impacted Wyoming perhaps more than any other state in the country. There is a great deal of optimism in Wyoming that Director Pruitt will bring an understanding to the EPA of how these decisions impact states and more importantly families and individuals.

We would love to have Director Pruitt out to Wyoming any time that he is available. Attached to this email is a request I received from the Wyoming Business Report asking if Director Pruitt could attend the Wyoming Energy Summit.

Thank you for your consideration.

Please let me know if you have any questions.

Mail Code: 1101A  
Washington, DC 20460

Dear Administrator Pruitt –

The Wyoming Business Report is the only business newspaper written and published in Wyoming. Established in 2000, we report on every industry active in the state – and as you know, the most active of these is energy.

On May 18, we will be presenting our fourth annual Wyoming Energy Summit in Cheyenne. Presented in partnership with Wyoming Governor Matt Mead, the Summit is attended by industry leaders from both Wyoming and Colorado interested in networking and learning about the most pressing issues in oil, gas, coal, wind and uranium.

Our readers and event attendees are naturally very interested to learn what the new administration has in store for the industry. They are eager to learn what changes to expect from the new administration, and in particular from the revamped EPA.

We invite you to come and speak to the leaders of the state and of the energy industry on the new role of the EPA in our state and in the nation's energy future.

Sincerely,

MJ Clark  
Executive Editor  
Wyoming Business Report
