CONTAINER SWITCH

In our search for a better package for solid waste, we have found a package we feel will go a long way toward our goal. The package is a five gallon plastic (polyethelene) container with a snap lid (including an O ring gasket). We would like everyone to switch as soon as possible to the new containers. Pricing will be effected as shown on the updated attachment (rate codes 26, 28, and 34). The new containers will be charged at the rate shown by rate code 34 and 26. All other containers will be charged at the rate shown by rate code 28.

This package is the correct size for materials of between 24,000 BTU/# and below. However we are still looking for a package that will give us more volume for materials in the 12,000 BTU/# range and below. We think we will have this package very soon.

D.A. Van Wyk, Sr.
