Dear Dr. Kehoe:

Periodically you have been checking men in our employ who have had industrial exposure to lead.

At this time we have 10 spray painters and two lead burners, a total of twelve (12) men who are due for a yearly check-up. You have case histories on eleven (11) of these men and we will furnish information on the new man and bring your records up to date on the others.

You probably will want to furnish us, as in the past, with the necessary sterile needles and sample containers for both blood and urinary lead. We assume that your fee for this work will be \$10.00 per individual unless you advise us otherwise.

We wish to thank you for your kindness in assisting us with this problem.

Very truly yours,

ALUMINUM ORE COMPANY
