11 (b) (i)-(iii): See Answer to Interrogatory no.
 12 10(a).

13 (iv) None.

14 (c) All automotive and off-road friction prod-
 15 ucts manufactured by Abex contained approximately 25-65 percent
 16 chrysotile asbestos only.

17 (d) Brake lining material is shaped into curved,
 18 linear segments in such physical dimensions necessitated by the
 19 specifications, characteristics and use established by the manu-
 20 facturer of the vehicle or the equipment on which the lining
 21 material will be applied.

22 Brake pads are basically rectangular in appearance and
 23 are composed of a lining material adhered to a metal mounting
 24 plate.

25 All Comet brake shoes had the word "Comet" stamped on
 26 the outer side of the product.
