s are subject to the effects of heat, light, age and processes beyond our control and in turn may vary slightly in color or sheen from the actual paint in the container.

DEPEND ON DUTCH BOY more years to the gallon

Dutch Boy Porch and Floor Enamel has been especially compounded to stand up under the heaviest traffic, indoors and out. Its tough film resists scuffing, chipping, cracking—and the effects of sun and moisture. Bright, hard, it keeps its luster in spite of weather and repeated washing.

Dutch Boy Porch and Floor Enamel offers ideal protection for wooden porches, steps, walks and decks, for concrete surfaces, brick or metal. It spreads easily and smoothly, dries quickly—newly painted interior floors are back in service in no time. It's the logical choice for any surface that must take severe wear or exposure to the weather.
