Mr. W. Dale Compton
Ford Motor Company
P.O. Box 1718
Dearborn, Michigan 48121

Dear Mr. Compton:

We have been most appreciative of the assistance given us by the Ford Motor Company in making available to us a grant of $5,000 for the academic year 1972-1973, in support of our research program on asbestos toxicology. It has enabled us to explore some basic problems successfully.

We consider that it might now be useful to review the status of this work with your scientific representatives. You had informed us that Dr. E. Eichen would be responsible for such inter-institutional relationships. It is my understanding that Dr. Eichen has assumed new responsibilities at Ford. I would appreciate advice from you concerning whether his new post includes the responsibility of working with us. Of course, it will be a pleasure for us to remain in contact with him, or such other scientist of whom we are advised.

Sincerely yours,

Irving J. Selikoff, M.D.
Professor

Director, Environmental Sciences Laboratory
