Re: Claim No. O. D. 17057

Dr. Sidney McGurdy
Supervisor of Medical Section
The Ohio Industrial Commission
Columbus, Ohio

Dear Doctor McGurdy:

At the request of Dr. Anthony Matuska, I visited and later examined at my laboratory the above claimant. Dr. Matuska had come to the conclusion that this man was not responding to treatment and that the conditions under which he was living were in part responsible for the delay in his recovery. As you will see from my report, I am not altogether certain that this was the case. I am rather disposed to believe that this man had some slight neuritis at the time of his original illness, and that his present disability is in part an extension of the original neuritis due to rather slow development plus a certain amount of flexor contracture, as a residual. In any case I feel that there is very little doubt that the background of this man's disability is a severe lead exposure in the course of his occupation.

I am sending you herewith my report on the case. As I have indicated, I felt it necessary in his interest to arrange for his admission to the Cincinnati General Hospital for prompt medical care and observation. No doubt you will have further reports from the medical staff of the General Hospital on his case. I shall make it a point to see him and to contribute anything I can to his care, but I have no responsibility since I am not a member of the Department of Internal Medicine under whose care he now is.

I enclose herewith a bill for my services.

Very truly yours,

RAK:is

Robert A. Kehoe, M.D.
