Subject: Consortium Informational Documents in PDF format.

Importance: High

<outbind://20/Archives/BZCHINA22500.ppt> Consortium Stakeholders,

Due to some unforeseen formatting problems I just became aware of, I have reposted the Final versions of the three documents listed below in PDF format. They are also available as Word documents in a separate link below and on the web page. I have also attached the PDF files for your convenience.

Informational Materials - These are documents that are designed to assist potential stakeholders in briefings with their management and to help in soliciting additional stakeholders into the consortium. All are available as PDF documents, and in their native MS-Word format.

*

<<http://www.api.org/benzene-consortium/Information/BreifOverview.pdf>>
Proposed Studies on the Risk of Benzene-Induced Diseases in China - A two page, color document designed to be copied double-sided onto one page. Very general in nature, this document includes estimated costs and a simple description of the draft funding formula. (last updated March 2, 2001, also available in Word

<<http://www.api.org/benzene-consortium/Information/OnePagerFINAL.doc>>
format)

*

<<http://www.api.org/benzene-consortium/Information/ConsortiumQ&A.pdf>>
Consortium Q&A - A set of the questions most often asked, and responses to them. This particular document is targeted to the petrochemical industry. Additional versions targeted to different audience groups are under development. (last updated March 1, 2001, also available in Word
<http://www.api.org/benzene-consortium/Information/ConsortiumQA_FINAL.doc>
format)

*

Ethics
<<http://www.api.org/benzene-consortium/Information/EthicsOnePagerFINAL.doc>>
Considerations and Status of Resolution - A brief description of the ethical issues that have been considered in the process of developing the study protocols and the status of steps taken to resolve those issues. (last updated March 2, 2001, also available in Word
<<http://www.api.org/benzene-consortium/Information/EthicsOnePagerFINAL.doc>>
format)
