Gentlemen:

Claim 6032514 - Vernon Rickert

Mr.Vernon Rickert, who is a supervisor at Rinshed Mason Company of Canada Limited, developed a chest condition which is thought to be due to exposure to fumes in his work.

Various enquiries have been made regarding the cause of these fumes and it seems that a product called Ariclor may have some bearing on this case.

We would appreciate it if you would give us a breakdown on the composition of this material.

Yours very truly,

Claims Department.
