Mission Statement

The Chlorine Institute, Inc. exists to support the chlor-alkali industry and serve the public by fostering the continuous evaluation of and improvements to safety and the protection of human health and the environment connected with the production, distribution and use of chlorine, sodium and potassium hydroxides, and sodium hypochlorite; and the distribution and use of hydrogen chloride. The Institute meets this obligation by maintaining a scientific and technical organization that fully meets its members' and publics' needs and expectations. The Institute works with governmental agencies to encourage the use of credible science and technology in developing regulations impacting the industry.
