PROGRESS REPORT for the week ended June 13, 1947

INDUSTRIAL HYGIENE FOUNDATION Industrial Fellowship No. 259-13

Subjects under which report is to be indexed

3 copies made:
1 - Mellon Institute
2 - Industrial Hygiene files

The "dustiness index" for Asbestos roving was continued, however the results were not too conclusive since the problem of duplicating results was still to be determined.

Dust counts were made on the asbestos spirals and the material from the respective segments saved for silica analysis.

Mr. R. Emmett Doherty of the Anthracite Coal Institute was familiarized with the Foundation's techniques of dust sampling and analysis.

Size separations for Indenmity Insurance Company were continued.
