

JUL 19 1972

FROM W. J. Bennis

DATE July 18, 1972

FOR Mr. I. J. Foote, UCB

CITY Cleveland 44115

ANSWERING
LETTER OFSUBJECT SOLVENT AND LEAD STATUS LISTING
Mr. W. M. Tome - July 5, 1972

THIS COPY FOR

Mr. G. L. Bechtel, "
Mr. W. M. Tome, DPJRC
Mr. R. J. Haviland, Central
Mr. R. M. Brenner, UCB

The report on solvent and lead status of solvent based products issued by Mr. W. M. Tome on July 5, 1972 has been reviewed. Those additional formulas now showing a "o" under the solvent designation are being reviewed with the label supplier by Mr. R. M. Brenner to have the "GF" imprinted on labels of the one gallon size or over. On those formulas designated "E", indicating an exempt formula is available, we will still wait for clearance from Mr. R. J. Haviland before putting the "GB" on the label so that we have assurance that all plants have converted to the exempt formula. On those formulas showing an "X" no action will be taken on the label until an exempt formula is available and notification is received from Mr. R. J. Haviland that the formula is now in use in all plants.

A number of Y-Line products are scheduled for discontinuation on December 31, 1972 in addition to those so designated on Mr. Tome's listing. These additional codes are shown below so that no work need be done on these products unless specifically requested by the Sales Department.

Y-5219	Y-5570	Y-5256	Y-5734	Y-5687**	Y-5400	Y-2201****	Y-4397	Y-2750
-Y-585	Y-5258	Y-5257	Y-5600**	Y-5680**	Y-5418	Y-4309	Y-4663	Y-2718
Y-5244	Y-5259	Y-5005*	Y-5618**	Y-534	Y-5013***	Y-4315	Y-37	Y-2787

* - Y-555 still active.

*** - Y-51 still active.

** - Y-4600 line items still active.

**** - Y-2241 still active.

Y-74 is filled in a litho can. Mr. R. M. Brenner is referring the need for a "GB" symbol to Mr. R. W. Larson.

A number of recommendations concerning products which do not meet the 0.5% lead limit were made in Mr. Tome's bulletin. Direction will have to be provided by the Sales Department on these recommendations. Several products were marked that they would probably be dropped. Decisions on this type of product should be made known immediately and fit into this year's discontinuation program since they will not be able to be transported interstate after January 1, 1973.

There are a few other products which are not being discontinued and which do not meet the 0.5% lead limit. Direction will have to be also received from the Sales Department on the status of these items. These products are as follows:

512-L-01102
512-L-01105

304-D-1
Y-5285

Y-5295
Y-4399

There are also a number of buyout products on this list on which solvent and lead status has not been determined as follows:

Y-5254
298-C-13

Y-5027
Y-5028

Y-4035

GL0012480

Mr. E. L. Patton is following these suppliers.
