To Larry Megargee	Mail Code#260 Riverside	From Janis L. Woodson	Mail Code 1125/4	Ext. 7713
Subject AIR SAMPLING EQUIPMENT LOAN			Date October 23, 1986	

Enclosed are two DuPont P4000 Multiflow Pumps, a multi-charger and an instruction booklet.

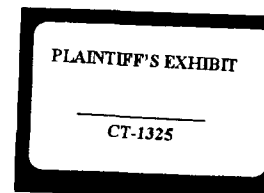

I have precalibrated the pumps; the calibration sheet is attached.

The pumps are easy to use, reliable and hold their flow rates constant but should still be calibrated after every sampling day. To turn the pump on, remove the faceplate, in the lower right hand corner is the on/off switch. All the other switches pertain to preset start and stop modes and should remain in their present position "manual" for your use.

If you should have any questions or problems, call me.

Subject ASBESTOS SAMPLING CASSETTES			Date August 26, 1986	

Enclosed are twenty (20) cassettes, which in addition to the other ones we left should be ample to complete the sampling.

When returning the samples, please include 10% blanks or a minimum of two (2) blanks if there are less than twenty (20) samples.

Thanks for all your help during our visit. It was appreciated!
