Dr. Arthur J. Vorwald,
The Trudeau Foundation,
Saranac Lake, N.Y.

Re: Cancer and Asbestos factors.

Dear Dr. Vorwald:

As mentioned in previous letters, I still remain very interested in cooperating with you in the study of cancer in the asbestos industry.

As briefly details, I want to say that from 9 cases of tumors of the lungs I saw was a bronchogenic cyst confirmed by a successful operation and histological study and 8 cases of cancer confirmed by autopsy from 1940 to 1949.

I hope to be able to give you as soon as possible some statistical tables and a short summary on each case.

Moreover Dr and myself will propose at the next meeting of the Asbestos Association that you be authorized to do a/an research work on this problem which is presenting an increasing actuality, at least in the medical literature.

Yours very truly,

PC/J3

Paul Cartier, M.D.
