Chuck Here's a copy of the "Safety Alert" that prompted my letter to Larry Calvert. Note distribution list - if it weren't for Calvert sending me a copy I wouldn't have even known of its existance. Heck - no one in your group was included not even Dave

Tom

SUBJECT: Safety Alert

Two locations have had incidents with the potential of personnel exposure to inadequate atmospheres in enclosures built for work on asbestos containing materials. Be sure your people are aware of the potential of these hazards and testing is done to insure oxygen, explosion limits, and that TLV requirements are met. The enclosures are confined spaces and need to meet your location requirements.

Both locations are conducting investigations of the incidents and we will send those as soon as they are available.

Thanks.

Very truly yours,

UNION CARBIDE CORPORATION

Larry E. Calvert
