THERMINOL FR SYSTEMS

C. PATON
B2S H

Attached is an up to date list of unapproved Therminol FR systems that require notification of their unapproved status. This list includes many accounts listed on Edition # 1 of our unapproved list as well as a new grouping of FR accounts such as the paint, resin, varnish, printing ink group. We have also included some accounts that have in the last two years only purchased very small amounts of Therminol FR.

A letter will be prepared and sent directly to the customer informing him of his unapproved status and offering him either Therminol 55 or Therminol 66 as an alternate. The letter will include information regarding PCB's and disposal of used FR. Should this letter include definite price discount information, possible price discount information or no reference to pricing? Also, should we refer them to the local salesman or back to St. Louis?
