8th November 1965.

Bag comes

Many thanks for your letter of 4th November; we certainly are very glad to be kept informed of the situation. So far as it goes at the moment the outcome is as good as one could have hoped for although I can't refrain from commenting that we have little confidence in the upper limit of safety (and I presume the one referred to is the limit used in the United States) and we also wonder what technique was used for actually making the dust counts referred to. You will appreciate I am not suggesting for one moment that the conclusions of Mr. Hatfull's letter should be questioned in any way but I think the points I have made are worth keeping in mind.

D.W. Hills.
