Last week I spent some time in the desert with Frank Elliott and we visited with Captain Ungar and Lt. Col. Mattison, of the 332nd Ordnance Division. This outfit has charge of repairs on all of the gasoline stoves.

As indicated in Frank Elliott's last letter, they have now received the 250,000 filters, which I believe takes care of all the stoves in this area, in regard to the burning of leaded gasolines.

Col. Mattison was very cooperative and I am sure arrangements could be made to physically examine or question any of the personnel in his command who has been at all concerned with this situation.

If there is anything further you wish me to do in this matter please let me know and I'll be only too happy to do it.

Yours very truly,

S. M. Wagner
