Dear Mr. Brown:

Thank you very much for your letter of April 19, together with copy of your letter of the same date to Mr. Rohrbach both in reference to advice which you have received from Sarnac Laboratory to the effect that a report on Dr. Gardner's asbestos dust experiments can be expected within approximately one month. My suggestion is that a small committee be appointed to review and make recommendations on the report after it is received by each of the contributing companies, and that when this committee has completed its review, they make their recommendations at a meeting of representatives of the entire group. I also suggest that in order to expedite the work, the committee be limited to three or four qualified representatives from the contributing companies.

Awaiting further word from you and with kind personal regards, I am

Yours sincerely,

President
