A Yes, I did.
Q What is an aggregate?
A Aggregate is a mixture that you mix with plaster. It could be sand, it could be perlite, vermiculite, different kinds of aggregates.
Q And do you know whether this Zonolite was perlite or not?
A The Zonolite wasn't perlite. Perlite was a different --
Q Was it a lightweight material?
A Yes, it was.
Q Was it sort of like cork, brownish and gray, kind of like cork?
A Zonolite was, yes.
Q And do you know whether that is sometimes called vermiculite?
A No, it is different.
Q All right.
A Vermiculite was a white.
Q All right. Now, let me ask you about, if I may, about -- incidentally, when you stuffed it in the
