SUBJECT: Safety Training Session
July 14, 1977

REFERENCE

TO: See Distribution List

By this time you will have received a notice about our training session for the new unit/craft representatives. I am looking forward to being with you that day.

You will notice that the outline of the meeting that we are planning to have has an item #4, Changes And Improvements Made. At this time during the session we plan to talk about the improvements made in safety in your area, unit, and craft. To help you prepare for the discussion during the meeting I would appreciate it if you would read your safety log book and review the corrections and changes made during 1977. I would like to get you to talk about these improvements during the meeting. Of course if you have some suggestions that have not yet received proper attention we would like to hear about those too.

Please review your log book with your contact supervisor and be prepared to tell the other teams about the program in your unit/craft for improving safety performance.

Looking forward to seeing you on the 14th.

J. A. Glass
