Off Shore Shipments of TML

July 14, 1960

During the discussion of TML and its medical clearance for sale in various countries, Dr. Kehoe requested that he be advised of all off shore shipments of TML until the product becomes an established article of commerce. I realize that the destination does not necessarily indicate that that country is the only one in which the gasoline will be sold, but will you please cooperate and give Dr. Kehoe the following information:

1. The company purchasing TML for shipment outside of the United States and Canada.
2. The number of drums
3. Destination
4. Date of shipment
5. An estimate of the date of arrival

I would suggest that you do this on a weekly basis and continue the report until January 1, 1961, by which time the distribution pattern throughout the world should be reasonably well established.
